SYSTEM STRUCTURE

Accurate location information can be obtained and time can be measured by high performance 10Hz GNSS antenna.

ISO CAN signals from the OBD connector of your vehicle can be showed.

The sensing data can be sent to DSD-F from ADVANCE System.

A separate switch unit which is easy to push by fingers with racing gloves is included in the package.

Sequential indicator consists of 10 red LEDs for the tachometer warning.

By using a USB flash drive, driving data can be recorded for a long time (a maximum of 9 hours 59 minutes 59 seconds per file).  
※Purchase a commercially available USB flash drive.

4.2inches touch panel TFT color LCD, a dim sensor, and a low reflection glass enhances the operatability and the readability.

Package: Boost Gauge 29PSI & ADVANCE Control Unit

One ADVANCE Control Unit can control up to 7 gauges.

**ADVANCE  
CAN Driver**

Components

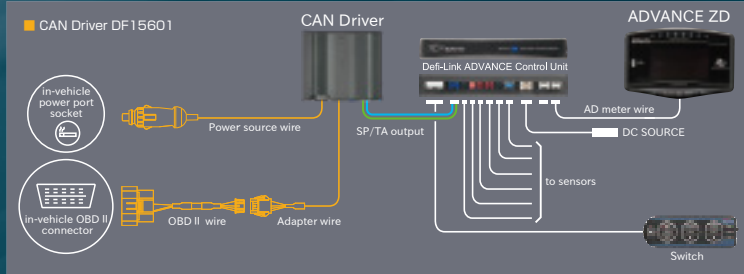

- CAN Driver ●Power source wire(PDF15601H)
- Speed & tachometer signal output wire(PDF15602H)
- Adapter wire 80cm(2 3/5") (PDF14502H)
- OBD II wire 20cm(8") (PDF14503H)

ADVANCE CAN Driver

●DF15601

Speed and engine speed signals can be sent from OBDII to an ADVANCE tachometer or ADVANCE System (if installed) even from vehicles which those signals cannot be obtained from ECU.

Connection examples

- Obtains ISO-CAN data from an OBDII connector. Up to 3 gauges can be connected. (ADVANCE Tachometer, turbo/boost/in-mani press, and water temp gauges) ①
- Obtains speed and engine speed pulses from ECU even from vehicles which those pulses cannot be obtained from ECU in case the ADVANCE Control Unit is installed.②

- OBD II wire 20cm(8") (PDF14503H)
- ADVANCE meter wire 2m(6 3/5') (PDF07710H)

●Main Features

- ISO-CAN data can be retrieved and ADVANCE gauges (tachometer, turbo/boost/in-mani, and water temperature) can be linked together.
- Speed/engine speed pulse can be retrieved from speed/engine speed of ISO-CAN data.
- Warning values can be set. Warning LEDs in gauges light up while exceeding the set warning values.
- Peak values can be checked. A commercial switch can be connected to the switch input line of the power source wire and used as a peak switch.
- 12V illumination ON/OFF signals can be output by retrieving vehicle illumination control signals.

Corresponding  
gauges

ADVANCE gauges: tachometer,  
turbo/boost(120kPa, 200kPa, 29PSI),  
in-mani pressure, water temperature

●Product Specifications

- Power-supply voltage: 10~16V (12V vehicles only)
- Current consumption  
(the maximum value obtained when connecting three gauges):  
ACC 1A (IGN ON), dark-current 0mA
- Temperature range (humidity is assumed to be 80% or lower):  
-30 to +60 °C/-22 to +140 °F for storage,  
-20 to +60 °C/-4 to +140 °F for operation

*CAN Driver tachometer set*

※ Commercial sensor attachments (thread size 1/8) are required to install pressure and temperature sensors.  
※ Defi-Link Meter USDM ADVANCE BF Series needs to be used with the ADVANCE Control Unit.  
※ USDM ADVANCE BF gauges which correspond to ADVANCE CAN Driver are 29PSI TURBO,intake manifold pressure, water temperature,and tachometer.

※ADVANCE gauges which correspond to ADVANCE CAN Driver are turbo/boost(120kPa, 200kPa, 29PSI), intake manifold pressure, water temperature, and tachometer. All the gauges listed cannot be used depending on vehicle models. Oil pressure, fuel pressure, oil temperature, exhaust temperature, ADVANCE ZD, or Defi SMART ADAPTER cannot be connected to ADVANCE CAN Driver.  
※Please make sure that your vehicle is applicable to this product at a shop of Defi products or contact our distributors before purchasing.

Defi-Link Meter  
**ADVANCE A1** Series

- Main Features
- The light-emitting gauge always provides clear visibility with high contrast.
- Brightness can be adjusted by selecting from five levels for daytime and nighttime separately.
- High visibility and quality is provided by low-reflection glass and metallic tone dial plate.
- Concave scales and warning mark
- Mounting bracket cover is included in the package.

●Main Features of ADVANCE A1

- Metallic tone dial plate with concave scales and fine circular hairlines
- Conventional glass
- Low-reflection glass
- IGN OFF

- ※Commercially available sensor attachments (thread size 1/8PT) are required to install pressure and temperature sensors.
- ※Commercially available rubber hose and three-way joint are required to install 300kPa turbo sensor.
- ※To operate ADVANCE A1 gauges, Defi-Link ADVANCE Control Unit or ADVANCE CAN Driver is necessary.
- ※Do not connect more than one gauge of the same variety. (i.e. You can NOT connect 2 turbo gauges together.)
- ※Oil pressure, fuel pressure, oil temperature, or exhaust temperature cannot be connected to ADVANCE CAN Driver.

Defi-Link Meter  
**ADVANCE RS** Series

- Main Features
- Interactive communication advanced system is implemented.
- Nippon Seiki's NS logo is printed on the dial face instead of Defi logo. It's because the NS logo used to be printed on our OEM gauges.
- The needle pointer is white while the illumination is OFF and red while the illumination is ON.
- The illumination color is green and warm white. The two colors can be switched.
- The brightness is turned down to make a nostalgic mood.

**Resale!!** <Order and delivery time> ADVANCE RS will be available on request.  
It takes up to 8 to 9 months to ship products after accepting orders because we manufacture RS gauges by order only twice a year.

Defi-Link Meter  
**ADVANCE ZD**

Defi-Link Meter ADVANCE ZD  
DF09701

- Main Features
- The ADVANCE SYSTEM (interactive communication) is implemented.
- The display panel adopts the high-brightness and high-definition OLED made by Nippon Seiki.
- By connecting this product to the ADVANCE SYSTEM, the illumination of ADVANCE BF and CR gauges are controlled automatically.
- Time of 0-100km/h (60MPH) and 0-200km/h (100MPH) can be measured.
- Warm-up mode is equipped to protect the vehicle engine.
- Opening and Ending modes can be selected from two variations.
- Self-diagnosis system detects breaking of wires, short circuit, and communication error and indicates the error conditions.
- Warning values can be set. The display is highlighted and a buzzer sounds during warning. (The buzzer can be set on/off)
- Sensor data, including peak value and warning value, can be recorded up to three minutes. It can be replayed after driving.
- When both a fuel pressure sensor and a turbo sensor are installed, differential pressure can be displayed.
- The display can be selected from 4 patterns. (Maximum of 6 items can be displayed on one screen.)
- The displayed items and the screen layout can be arranged.
- Has sequential indicator with 8 LEDs.
- Clock and alarm functions.
- Mounting angles are more flexible than conventional products.
- Has odometer and tripmeter.
- From 0°C(32°F) can be displayed on the oil, water, and exhaust temperature gauges.
- Graphic animation is played during idling - on special mode.
- Metric or imperial units can be displayed.

[Example]

●Product Specifications			
Power supply voltage	10V to 16V DC (for 12V vehicles)		
ADVANCE Control Unit Current consumption (Maximum value obtained when connecting 7 gauges or ZDs)	+B line	2A (IGN ON)	
		5mA (IGN OFF)	
	ILM line	800mA	
Operation temperature range	-20~+60°C, -4~+140°F (under 80% relative humidity)		
Storage temperature range	-30~+80°C, -22~+176°F (under 80% relative humidity)		
Display range	Speed	0~400km/h (0~240MPH)	
	Tachometer	0~11000RPM	
※The sensor sets for each Temp./Press.(OP1 through OP5) are required to display them.	OP1※#	Oil Pressure	0~1000kPa (0~145PSI)
	OP2※	Fuel Pressure	0~600kPa (0~87PSI)
	OP3※#	Oil Temperature	0~150°C (32~302°F)
	OP4※#	Water Temperature	0~150°C (32~302°F)
	OP5※	Exhaust Temperature	0~1100°C (32~2010°F)
※#Sensor sets for OP1,3, and 4 are included in the Club Sports Package.	Volt	10~16V	
	Clock	12 hours display	
Applicable speed pulse	2·4·8·16 pulse (mainly for Japanese vehicles) Pulse free setting:1274~16562pulse/km 2051~26665pulse/mile (2~26pulse)

Weight	400g, 0.9lb (including a box, mounting parts, wires, and accessories)		

Parts Name		Parts Number
OP1※#	AD oil press. sensor set	PDF08106SS
OP2※	AD fuel press. sensor set	PDF08205SS
OP3※#	AD oil temp. sensor set	PDF08305SS
OP4※#	AD water temp. sensor set	PDF08405SS
OP5※	AD e.g.t. temp. sensor set	PDF08505SS

- ※The Defi-Link ADVANCE SYSTEM Series products cannot be linked to the old Defi-Link System products.
- ※The ADVANCE ZD cannot display turbo or intake manifold pressure. The Defi-Link Meter ADVANCE ZD requires the ADVANCE Control Unit.
- ※ADVANCE ZD cannot be connected directly to ADVANCE CAN Driver (DF15601/DF15701/DF15702). If you want to get signals of speed and engine speed taken out from OBDII and display the values on ADVANCE ZD, ADVANCE Control Unit is necessary to be used together with ADVANCE ZD.

# Defi-Link Meter ADVANCE CR Series

- Main Features
- The ADVANCE SYSTEM adopts interactive communication.
- The flat glass, the long and thin pointer, and high-definition scale provide accurate readings which are easy-to-read. (CR/BF)
- Opening and Ending modes can be selected from two variations.
- When adding more than two gauges, you just connect one gauge to the next one, and arrange wires from the sensors to the ADVANCE Control Unit.
- Our original stepping motor provides smooth and quick response ideal for high performance sports driving.
- The maximum sweep angle 270° which is divided into 3072-4600 (0.088°-0.059°) and controlled by the microcomputer provides accurate sensor data.
- Self-diagnosis function signals a warning LED when it detects broken wires, short circuits, or communication errors.
- The warning value can be set. An alarm buzzer sounds when the warning LED (red) is turned on. It is available to turn on or off.
- Sensor data, including peak value and warning value, can be recorded up to three minutes. And it can be replayed after driving.
- Mounting bracket and a gauge pod are included as standard.
- By installing both a fuel pressure sensor and a turbo sensor, the differential pressure can be displayed on the fuel pressure gauge or the ADVANCE ZD.

- Features for only ADVANCE CR Series

※Do not connect more than one gauge of the same variety. (i.e. You can NOT connect 2 turbo gauges together.)  
※Oil pressure, fuel pressure, oil temperature, or exhaust temperature cannot be connected to ADVANCE CAN Driver.

Racer Gauge Series

●Main Features

- Stepping motor "STEP MASTER VS-2" provides smooth operations.
- A self-luminescence gauge when ignition is turned on.
- Beautifully illuminated by the high-brightness LED.
- Opening and Ending modes are designed to show lightning flashes when gauge is turned on and off.
- A 270-degree sweep style makes the pointer movement easier to read.
- A dedicated mounting bracket and a gauge pod are included as standard.
- The red triangle mark on the regular position bezel can be used as a warning indicator.
- A regular position bezel with a red triangle mark, which can be used as a warning indicator and others, is included as standard.
- Self-diagnosis function attempts to monitor broken wires and short circuits during the Opening mode.
- And the needle pointer's movement lets you know error conditions.

●Product Specifications

- Power Supply Voltage: DC10 ~ 15V (for 12V Vehicle)
- Current Consumption: +B line MAX 0.12A (Dark current 0mA)  
IGN line MAX 0.12A  
ILM line MAX 2mA

- Operation Temperature Range:  
-20 to +60°C, -4 to +140°F (under 80% relative humidity)
- Storage Temperature Range:  
-30 to +80°C, -22 to +176°F (under 80% relative humidity)
- Display Range: TURBO -100kPa ~ +200kPa  
PRESS. 0kPa ~ +1000kPa  
TEMP. 30°C ~ 150°C  
EXHAUST TEMP. 200°C ~ 1100°C  
VOLT 10 ~ 15V

●Main Features

- Stepping motor "STS26A" leads to a wide swing angle and accuracy.
- A self-luminescence gauge when ignition is turned on.
- Opening and Ending modes are designed to show lightning flashes when gauge is turned on and off.
- 5-levels dimming function both for the night and day.
- Dual warning from buzzer and warning LED.
- Large-sized indicator is included.
- Peak memory function.
- Detachable switch unit.
- Mounting bracket and a gauge pod are included as standard.

●Product Specifications

- Power Supply Voltage: DC10 ~ 15V (for 12V Vehicles)
- Current Consumption: +B (Red) line MAX 0.4A (Dark current 0mA)  
IGN (Orange) line MAX 0.4A  
ILM (White) line MAX 2mA
- Operation Temperature Range: -20 to +60°C (under 80% relative humidity)
- Storage Temperature Range: -30 to +80°C (under 80% relative humidity)
- Applicable Number of Cylinders: 1 · 2 · 3 · 4 · 5 · 6 · 8

●Indicator

Large-sized indicator can be set up to make a two-stage warning. The lights are displayed in green and red.

Blue Racer Gauge

φ52 2 1/16"

Blue Racer Gauge

φ80 3 1/8"

Red Racer Gauge

φ52 2 1/16"

Red Racer Gauge

φ80 3 1/8"

White Racer Gauge

φ52 2 1/16"

White Racer Gauge

φ80 3 1/8"

※Racer Gauge Series is stand-alone. Link connection is not available. The ADVANCE Control Unit is not required.  
※Illumination colors depend on the model. Color is unchangeable.  
※Commercial sensor attachments (thread size 1/8) are required to install pressure and temperature sensors.

# DIN-Gauge

DIN-Gauge [1-Din sized triple meter] ※Only for right-hand drive

- Main Features
  - Three gauges are neatly fitted into one DIN size.
  - Luxury feel is provided by flat face glass.
  - The instrument needle pointers of the three gauges move sequentially during Opening and Ending modes.
  - Three gauges are angled toward the driver (right-hand driver) for better visibility.
  - The maximum sweep angle 270° which is divided into 4600 (0.059°) and controlled by the microcomputer provides accurate sensor data.
  - Bright transparent gauge dials and instrument needle pointers are used in the gauges to increase visibility at night.
  - Illumination using high-brightness LEDs

- Product Specifications
  - Power Supply Voltage: DC10 ~ 16V (for 12V vehicles)
  - Current Consumption: +B line MAX 0.5A (Dark current 0mA)  
IGN line MAX 0.5A  
ILM line MAX 0.1A
  - Display Range: TEMP.1 30 ~ 150°C  
TEMP.2 50 ~ 150°C  
PRESS. 0 ~ 1000kPa
  - Sensor Tread Pitch: Temp. sensor 1/8PT  
Press. sensor 1/8PT
  - Dimensions: 7(W)X4 3/8(D)X2(H) inches, 178(W)X112(D)X50(H)mm
  - Gross Weight: 1100g, 2.43lb. (including DIN-Gauge, harnesses, parts, package)

※DIN-Gauge is stand-alone. The ADVANCE Control Unit is not required.  
※There are some cases that a commercial audio bracket may be needed when installing this product.  
※Commercial sensor attachments (thread size 1/8) are required to install pressure and temperature sensors.

# iOS/Android SMART ADAPTER W

## SMART ADAPTER W

- DF14501 ( ADVANCE UNIT connect )
- For OS : iOS7- / Android2.2-

## SMART ADAPTER W OBD SET

- DF14502 ( OBD II + ADVANCE UNIT connect )
- For OS : iOS7- / Android2.2-

### APPS

Defi Meter C  
iOS / Android

Defi Logger  
iOS / Android

- Main Features
  - This product transmits the vehicle information to an iOS or an Android OS device via Bluetooth, and the applications can display its information on a mobile device .
  - The SMART ADAPTER W can transmit data from vehicle OBD II system and/or with the Defi ADVANCE SYSTEM to a mobile device (simultaneous data when OBD II and the ADVANCE SYSTEM are used in conjunction).

wireless

### ① Connection to OBDII (DF14502 recommended product)

### ② Connection to the ADVANCE SYSTEM (DF14501 recommended product)

### ③ Connection to both the ADVANCE SYSTEM and the OBDII connector (DF14502 recommended product)

※Vehicle information taken from OBDII cannot be displayed on ADVANCE gauges.  
※SMART ADAPTER W complies to the radio laws of Japan, North America, and Canada at this stage.  
※Please make sure that your vehicle/device are applicable to this product before purchasing. Contact our official US distributor TEIN USA for details.
