

Defi Sports Display F UPDATE Ver.3.0 manual

1. DIFFERENTIAL TIME function is added.

- DIFFERENTIAL TIME is a function to display the split time difference at each 500m line and the goal line during time measurement in a closed course.
- The time difference from the best split time from start to finish of time measurement is displayed. (0 ~ ±59 : 99)
- The font color is displayed in blue (minus) when it is faster than the fastest time, and red (plus) in case of late. Its value is updated when passing through each sector line.
- DIFFERENTIAL TIME can be selected in page 4 (OTHER) of meter changeover screen.

Confirmation

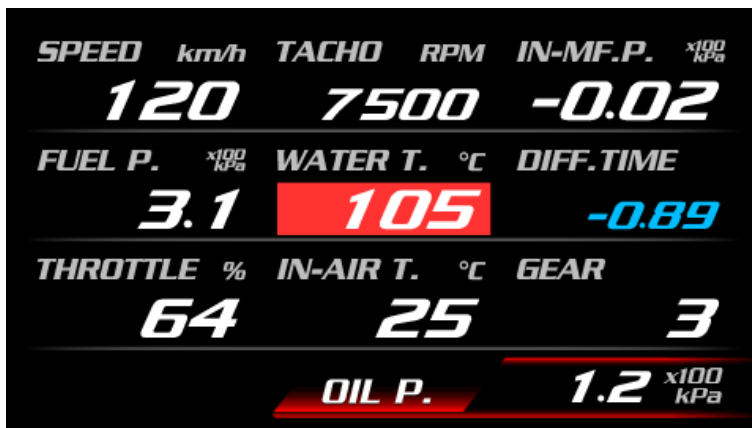

- "----" is displayed in white in cases other than the measurement of closed courses.
- When a measurement error occurs (such as when the driving route changes due to a pit-in), "----" is displayed in red.
- TIME DIFFERENCE is not the time difference with BEST TIME.
- NOW TIME of the previous version has been integrated into TIME display in the MID.

2. The signal source for each gauge is displayed by one-touch operation in Meter mode.

When digital gauges are displayed on the screen, the signal sources ("AD" or "OBD") are shown by touching the screen or pressing the ENTER/MENU switch.

3. The warning display becomes easy to recognize.

When a warning occurs in digital gauges, the area background is displayed in red. (Red letters on black background in the previous version)
