## Defi Sports Display F Update Ver. 6.0 Manual

## 1.Lap count display during time measurement (for closed course)

The lap count is displayed when measuring times on closed courses. (except in $G /$ locus mode)
In addition, the lap count can be reset by the switch unit or touch panel operation when the lap count is displayed.
■Example of lap count display (automatically displayed on the left side of the multi-information display)

From waiting for time measurement to start of measurement

- "0" or the last lap count is displayed.

Reset by user operation

- "---" is displayed and reset to "0"

From the start of time measurement to passing the measurement line - On the first lap: "1" is displayed. (as needed)

The number of laps is added each time the measurement line is passed. (up to 255 laps)

■How to reset lap count (valid only when lap count is displayed)

(1)Press the left button on the switch unit.
(2)Tap the portion where the number of laps is displayed.
(Models with touch panel: DF15901 and DF15902 only)
※The lap count is also reset when the power is turned off.
※Reset operation cannot be performed while the display items are being changed.

## 2. <For ADVANCE CONTROL UNIT> Reference display of GPS vehicle speed for speed pulse free setting (DF07701, 03 and DF17701)

GPS vehicle speed is displayed on the DSDF for reference
when setting the ADVANCE UNIT's vehicle speed pulse free setting.

PULGE FREE
PUSH at $\boldsymbol{B} \square \mathbf{~ k r m / h}$

ARVANLE SYSTEM SETUP
